Subject: updated monitoring schedule for FMCV water system
Attachments: 2017 02 08-Monitoring Schedule-090400106.pdf

Hello Ivan,

I hope everything is going well in First Mesa. I've updated your monitoring schedule for 2017 and it's attached. Please review it and let me know if you have any questions.

During your last sanitary survey in November, your population served was updated from 2600 to a current population of 3917. This increase triggers a change in your total coliform sample number from **3 to 4 samples per month**. Please identify an additional sample site to collect your fourth monthly routine sample in the upper mesa distribution system. I believe that is the only area of the water system that isn't represented in your current sampling protocol. You should start this additional sampling in March 2017. I spoke with Sharon earlier today to discuss this.

The other change that was triggered by the population increase is in your SOC sampling. Next year when you collect SOC samples, you will need to sample **twice** in different quarters. So you will have to do two rounds of SOC samples next year and the rounds should be taken in two different quarters.

Let me know if you have questions about the changes.

Thanks,

Emmanuelle

Please: All data submittals to our office should be sent by email to datamanager@epa.gov with a copy to me (or your project manager in the Drinking Water Office). Data reports are due no later than the **10th** of the month following the month that you receive results, or the **10th** of the month following the compliance period, whichever comes first. Please include the whole lab report and copy of the Chain of Custody. Label with PWS name and number; & source or distribution system location codes or names for data collection points.
